

# 3D Printed Hybrid Water Cleaning Robot with Camera and Servo Manipulator

## Problems Identification (もんだいていき)

Unsafe Waste Collection

Inefficient Water Cleaning

Limited Land-Water Mobility

Lack of Live Monitoring

Land & Water Operation

To Automated Waste Collection

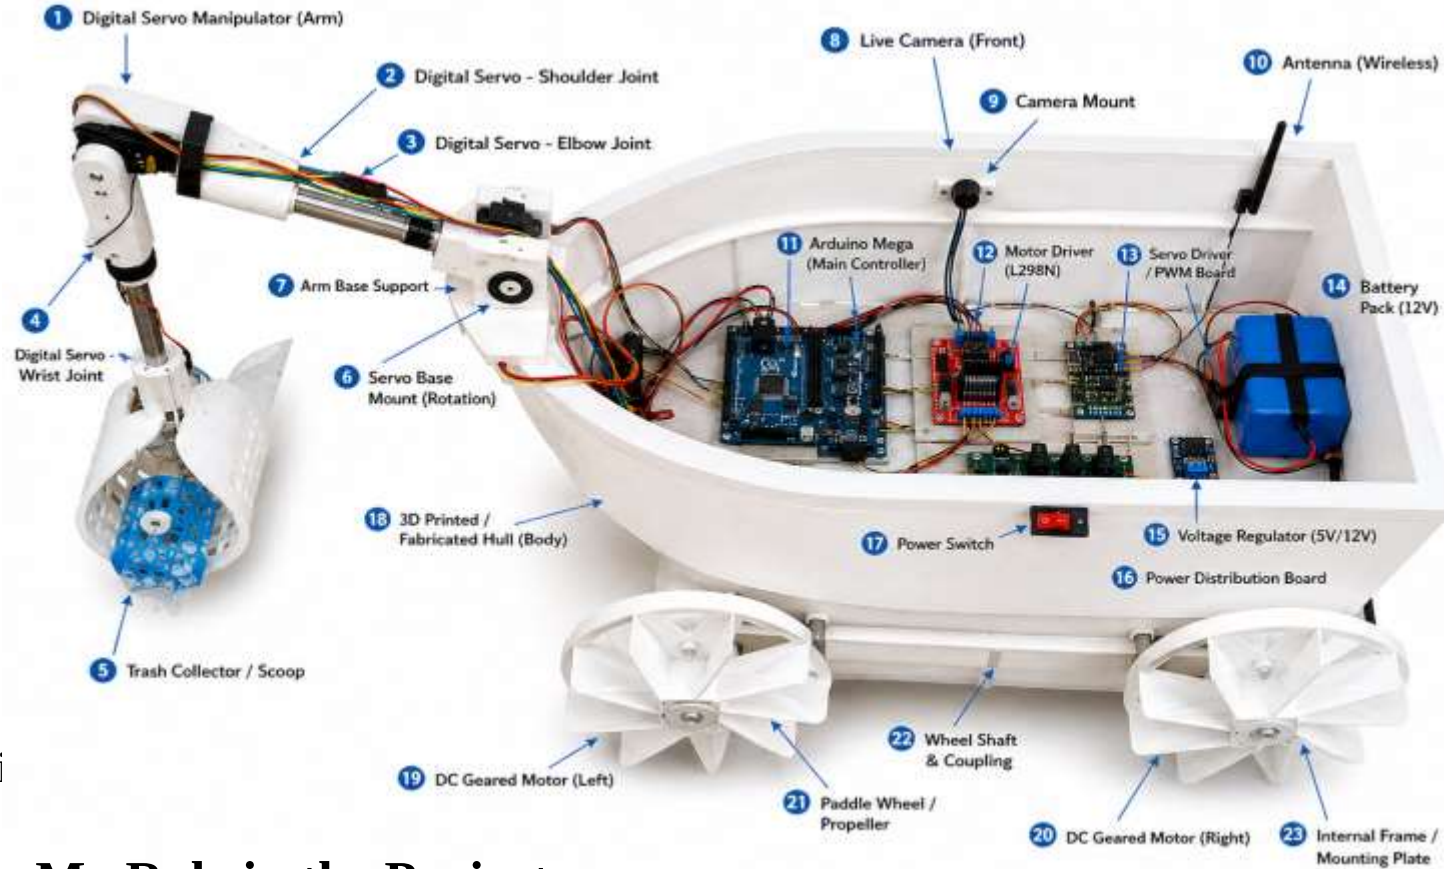

Live Camera & Remote Monitoring

Safe & Efficient Cleaning

## Prototype image(しさくき の がぞう)

## My Role in the Project

(プロジェクト における わたし の やくわり)

->2D & 3D Designing

->Arduino Programming

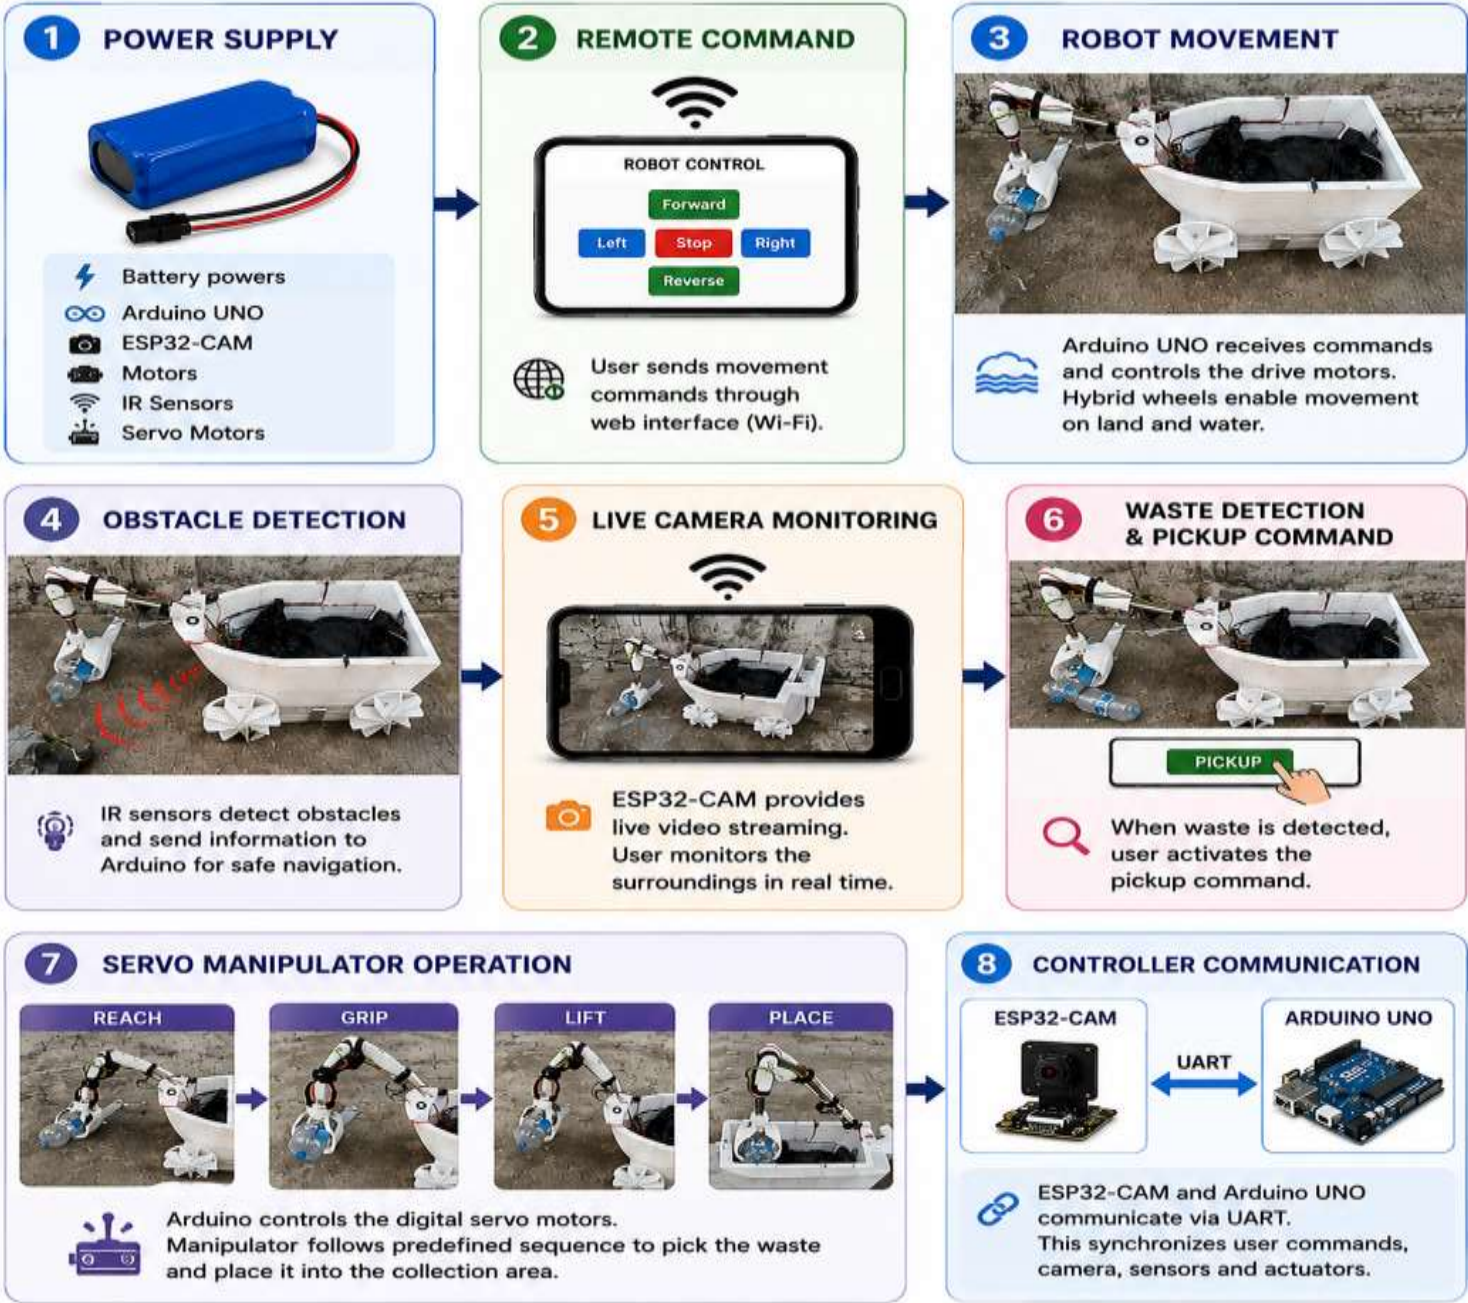

**Presented by:**

**K.Indhu**

**Aditya University**

# System Architecture: (システムアーキテクチャ)

# Working Mechanism: (どうさげんり)

## Technologies Used: (しようぎじゅつ)

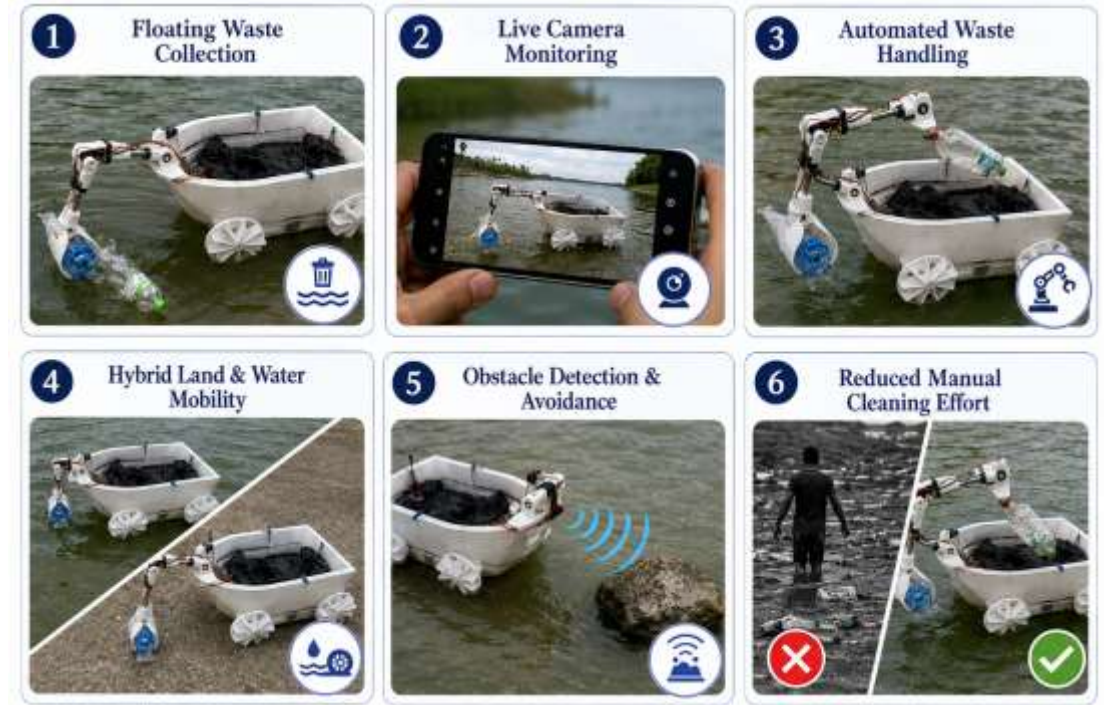

### Hardware(どうえあ こうせい):

### Software (しようにんのそふと):

## Results (プロジェクトのけつ

### Future Scope(こんご の かいぜ

- >AI-Based Waste Detection
- >Autonomous Navigation
- >IoT & Water Quality Monitoring
